

**Kent/SeaTac/Maple Valley Fire Department
Annual Competency Objective
SCBA Emergency Operations**

RIT/RIC Trans-fill

TASK:

Demonstrate Trans-Fill of a 3-person crew using a RIT/RIC kit.

Performance Outcome:

Crew will be able to quickly and efficiently use a RIT/RIC kit to Trans-Fill a 3-person crew while putting an equal amount of air in each SCBA.

Conditions:

Firefighters will be in full bunkers, SCBA, in a simulated smoke-filled drill area.

No.	Task Steps
1.	RIT/RIC crew will assemble gear.
2.	RIT/RIC will locate disabled crew.
3.	Verify condition of downed members, noting air supply.
4.	Starting with lowest bottle first, use RIT/RIC kit to Trans-Fill SCBAs.
5.	Pressure gauges should be monitored to ensure that all 3 bottles are filled equally.
6.	If enough air cannot be delivered by the RIT/RIC kit, another spare bottle or rescuers bottle may be used.
7.	For additional complication: One victim is missing a facepiece. This victim must don a facepiece from the RIT/RIC kit.
