

# Boat/Trailer Rodeo

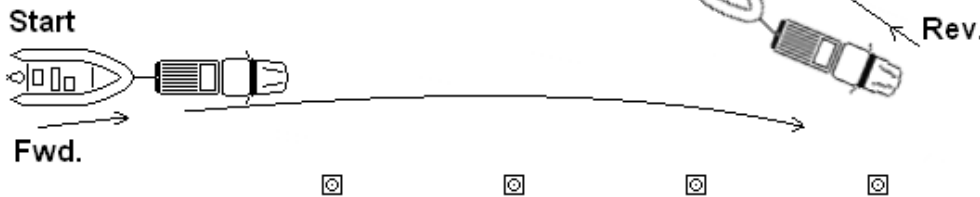

## Lane Change (Fwd./Rev.)

Manuever through the cones performing a lane change going forward first and then reverse. This develops competency in allowing enough room for the trailer to clear prior to making a turn. Also helps develop skill when backing a trailer.

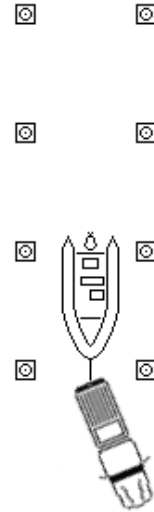

## Backing Trailer

Manuever trailer with boat as if backing into a station bay. Distance to turn-out prior to backing is limited. Develops backing skills for positioning trailer for boat launch and returning to the station.

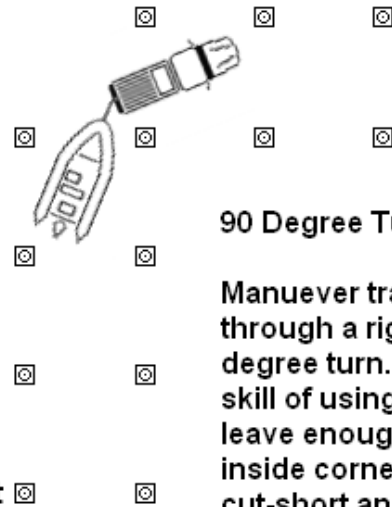

End

End

## 90 Degree Turn

Manuever trailer with boat through a right-hand 90 degree turn. Develops the skill of using judgement to leave enough room on the inside corner so it is not cut-short and stay within traffic lanes.

Start

Traffic lane widths should be 10'-12'.
